

Senior Procurement and Supply Chain Management Expert

ResultsinHealth is currently looking for a part-time independent **Senior Procurement and Supply Management (PSM) Expert** who is experienced in assessing grants and systems to procure and manage health commodities in multiple countries, based in **South-East Asia**.

About ResultsinHealth

ResultsinHealth has major responsibilities for PSM oversight activities in over 50 countries, through a collaborative agreement with PricewaterhouseCoopers and the Global Fund to Fight AIDS, Tuberculosis and Malaria for Local Fund Agent (LFA) services. Products procured under Global Fund grants include pharmaceuticals, diagnostics, lab materials, medical equipment, PPE, and preventive materials such as long-lasting insecticide treated nets and condoms. Our mission is to ensure their rational forecast, purchase, distribution and use throughout the health system by assisting implementing partners, governments and donors with reviews and recommendations.

The team you are part of

We work amongst a team comprising local and international experts in Monitoring & Evaluation, Finance, Management, Laboratory and other technical areas as required by the grants specifics.

Responsibilities

Assessments relate to the full cycle of product selection, quantification of needs, procurement, quality assurance, storage, distribution, inventory management, and their appropriate use. You will assess and monitor PSM and LMIS systems, with the aim of ensuring best practices and risk minimization for the Global Fund grants. Activities may involve onsite assessment visits, as well as desk reviews of PSM related planning and monitoring documentation.

You will be asked to collaborate and provide quality-assurance review for Junior PSM Experts working locally in some portfolios. Illustrative list of countries under consideration: Myanmar, Thailand, Cambodia and Vietnam.

The profile

We are looking for technically gifted partners with exceptional analytical and diplomatic skills. The ability to clearly identify, prioritize and summarize recommendations are key for success in this position.

Qualifications

You can successfully qualify for the position if you have:

- a university degree in pharmacy, in health, or in a related area;
- 7 or more years of experience in international procurement and supply chain management of health products, including extensive knowledge of public sector operations.
